EDUCATION

Northeastern University	Boston, MA
<i>Candidate for B.S. in Computer Science, Minor in Mathematics</i>	September 2021 – May 2025
Achievements:	3.99/4.00 GPA, Dean's List Award (×6), Dean's Scholarship
Coursework:	Algorithms and Data Structures, Object Oriented Design, Fundamentals of Software Engineering, Database Design, Distributed Systems, Natural Language Processing, Intro to Machine Learning, Multivariable Calculus, Mathematics of Data Models, Probability and Statistics, Linear Algebra

TECHNICAL SKILLS

Languages:	Java, Python, C#, SQL, TypeScript, JavaScript, C, HTML, CSS
Frameworks & Libraries:	Spring, MySQL, PostgreSQL, Redis, Angular, React, Pandas, NumPy, PyTorch, Kafka
Developer Tools:	Git, Docker, Kubernetes, Unix, Linux, Jira

EXPERIENCE

Software Engineer Intern — Salesforce, <i>San Francisco, CA</i>	May 2024 – August 2024
<ul style="list-style-type: none">Extended 2 Spring Boot/WebFlux APIs with 8 new routes to introduce admin functionality in Intelligent Document Processing tool, enhancing data management (Postgres, Redis) and runtime microservices (AWS Textract)Spearheaded launch of IDP Admin Console UI, delivering 12 monitoring features with AngularJS and Bootstrap. Reduced average troubleshooting time 30% by shifting solution engineers from terminal to centralized applicationResearched performance/functional impacts of LLM Gateway integration using Kubernetes and Splunk. Enabled expansion of supported models, boosting average confidence scores 8% and broadening customer baseEliminated 80% of manual validation in human review tasks by refactoring scope of extraction criteria enforcementOrchestrated VTO event with 30+ employees, recruiting external charity speaker and leading hands-on team activity	
Software Tools Co-Op — Insulet Corporation, <i>Acton, MA</i>	July 2023 – December 2023
<ul style="list-style-type: none">Automated hardware connectivity testing in quality assurance tool with C# and MySQL, scaling batch capacity 500%. Reduced batch processing time by 2 hours and slashed related manual laborPioneered team's transition to automated API testing by automating execution of 42 manual software tests with Python. Consequently spearheaded integration of ReadyAPI, mitigating human interaction to reduce test suite run time 80%Implemented workflow encapsulation using publisher-subscriber design, enhancing GUI with 3 live status indicatorsRefactored hardware interaction layer with template method pattern, maximizing modularity across 14 response classes	
Software Engineer Intern — Ultimate Kronos Group (UKG), <i>Virtual</i>	May 2022 – December 2022
<ul style="list-style-type: none">Earned Employee of Month and job extension offer after solving critical system failure impacting 4 high-value clientsDiagnosed and resolved 31 software bugs by interfacing with customers, implementing fixes using C# and AngularBuilt app in internal Hackathon to automate local environment setup, reducing average onboarding time by 2 daysDirected one Agile stand-up meeting per week for 10-member team, demonstrating leadership and initiativeDebugged 70+ failing end-to-end tests using Selenium and NUnit, contributing to 8% improvement in test coverage	

PROJECTS

High-Performance Data Pipeline <i>Python, PyTorch, Kafka, PySpark, MariaDB</i>	June 2024
<ul style="list-style-type: none">Engineered data pipeline with 3 web scrapers and 2 Finance APIs, extracting and calculating 20+ financial metrics (e.g., order volume imbalance, micro-price, Bollinger Bands). Warehoused data using MariaDBOptimized processing latency and scalability in distributed data streams by integrating Kafka and PySparkTrained BiGRU neural network with PyTorch, predicting direction and degree of stock movement in real-time	
Facial Detection Attendance Tracker <i>Python, Google Cloud Platform, Azure, OpenCV</i>	January 2024
<ul style="list-style-type: none">Designed facial recognition system to automate roll call at club meetings of 100+ membersSlashed API calls 80% by integrating GCP's Video Intelligence to identify and skip all video segments without facesLeveraged Azure's Face API and OpenCV to annotate detected faces with bounding boxes and predicted labels	

ACTIVITIES & INTERESTS

Activities:	Fundraiser Coordinator (<i>Breakthrough T1D</i>), Undergraduate Career Mentor
Interests:	Downhill Longboarding, Coffee, Mechanical Keyboards, Traveling, Restaurants, Bodybuilding
